

Assignment: A sandwich creation page

Instructions:

- You can use the same repository that you made for mini assignment 1. Make sure to change the name of the current index to something different.
- The new index.html will hold the code for this exercise.
- Create a form that can be used to build a sandwich
- The form should have:
 - a. A way to name your sandwich (text box)
 - b. A way to select one kind of bread (radio)
 - c. A way to choose from the kind of protein to use
 - i. There is a lot of toppings possible (pork, turkey, beef, ham, sausage, etc)
 - ii. Use a drop down select to save space! (select)
 - d. A way to select 1 or more toppings (check box)
- Remember to use <label> to add a small description to each form element.

Submission Guidelines:

- Show it to a TA

Resources:

- HTML example code on resources github for forms.
